Welcome at Schanzlin

A family company with 100 years of tradition and experience

We belong to the high performing innovating suppliers

Schanzlin-group

SCHANZLIN VERWALTUNGS GmbH
SCHANZLIN MASCHINENFABRIK GmbH
SCHANZLIN ANTRIEBSECHNIK GmbH
SCHANZLIN TRAKTOREN UND MASCHINEN GmbH
79367 Weisweil / Baden
(near Freiburg/Breisgau)

Page 3

It was in the beautiful „Wiesental-Fahrnau / Black Forest“ region near the Swiss border and the City of Basel that Schanzlin was born in 1908 when the grandfather of Horst Schanzlin, current company owner and General Manager, established the company.

From a small mechanical workshop which even at this time produced f.i. pumps, strap saws, planing machines, straw cutters, small walk behind tractors and many other products, **schanzlin** Antriebstechnik GmbH the company we know today developed. Even then Schanzlin was a subcontractor and supplier of turned parts for the gear production.

As early as 1948 when the motorisation of agriculture began, with machines like powered mowers, walk behind tractors, rotary cultivators and small 4-wheel-tractors, **schanzlin** was one of the few companies leading the development of these new technologies pioneering technology and acquiring know how in the sector of transmission and axle production.

In 1953 the move to Weisweil followed .

Most modern technology, quality and experience with a highly skilled workforce are securing success also for the future.

schanzlin today is a group of companies with approx. 90 employees. Also the lending work force is part of the business success.

A large factory site of about 30.000 m² of which about 8.000 m² is covered and increasing demand from customers are the the basis for further expansion. Our motto: buildings cost money, machines are earning money

the company group is run in the third family generation by CEO Horst Schanzlin, company owner, sole companion, and General Manager
Members of the board of management in the 4,th generation are:
Sabine Schanzlin / commercial formation
Gaby Schanzlin / technical formation

schanzlin : this means quality and experience since more than 100 years
Certainly you wish to know more about us – this brochure will answer some of your questions.

The system supplier

Constancy and calculability since 100 years

schanzlin offers:

very competitive price:performance ratio,
quality , reliability, compliance with quantity and delay along with security of supply

modern flexible CNC machining and application of suitable machine tools for optimized production

Page 5

schanzlin is partner of her customers. For this reason long lasting business relationships are central element belonging to the tradition of the high performance constant flexible company.

For decades ***schanzlin*** products have been delivered all over the world. Export accounts for about 25% of the Group's total business. Continuous growth is central to the company-strategy.

We are specialist for machining of precision parts in cast-iron and forged steel. For decades this family business has been partner and reliable supplier for well-known manufacturers of transmissions, engines, construction machines, trucks, off-road-, utility-, commercial vehicles and rail vehicles.

Companies like f.i. Daimler AG and many others are among the exacting customers both in Germany and abroad.

As medium-sized company specialised in machining of series produced parts, we are also prepared for ***purchasing of raw material*** upon request.

By this way the customer deals with a single "one-stop" partner.

We are producing parts and components up to 150 kg in big lot-sizes

experience

100 years of tradition and

Page 6

Certification according to ISO / TS 16949

Confident supply and quality

Competence in quality,
Competence in logistics,
Competence in production,
Competence in technology

Page 7

Manufacture at **schanzlin** is characterised by maximum flexibility with optimised automated series production of typical CNC parts.

Ecologic responsibility belongs to the business principles of **schanzlin**.

We help you to reduce your vertical integration and concentrate on your core-competence thus avoiding unnecessary investment and achieving improved liquidity and cost-flexibility.

To buy components from us means a good strategy for cost- and price-reduction.

Personal contact leads to common actions and common problem solutions.

Longlasting partnership for reason of competence

100 years of tradition and

experience
Page 8

Progress for the future

Reliable, consciuos of quality
In due delay

Page 9

Only a quality-philosophy in all sectors of the company creates failure-free products . Part of our all-over-quality strategy for this reason is also to reduce emissions.

A very careful and exact final control makes sure to supply zero-defekt products even with just-in-time delivery.

New technologies, high professional qualifications and motivation of the staff are decisive factors for success, enhancement of quality , creativity and engagement.

Automotive parts are produced even faster with most modern multifunctional double-spindle machining centers, coordinating several machining processes, on table sizes 500 x 500 , 630 x 630 and 800 x 800 with pallet change and high part weight and material up to GGG 60.

According to the latest realizations of manufacturing and technology **schanzlin** is the right partner.

We supply machined parts and take over also the purchase of material, logistics, financial need, up to controlled supply directly to your assembly-line.

Enough manufacturing capacity also for the future, good financial standing, flourishing circumstances, and simple logistics, make **schanzlin** a competent partner for value creation.

Innovation and swiftness
as common business-culture

100 years of tradition and

experience

Production of series-parts up to 100.000 parts and more

Page 10

Technical Data

schanzlin actually disposes about approx. 30 CNC machining centers of most modern construction with pallet change; quality through application of most modern technology together with decades of experience

Horizontal Center

X axle (movement to left/right)	800 mm
Y axle (movement up/down)	800 mm
Z axle (palet go / back)	800 mm
Pallet size	500 mm x 500 mmMax.
processing size	Φ 900 mm x 1000 mm
Pallets	2
Weight of pallet	up to 1000 kg
High pressure cooling	70 bar

X axle (movement to left/right)	1050 mm
Y axle (movement up/down)	800 mm
Z axle (palet go / back)	800 mm
Pallet size	630 mm x 630 mmMax.
processing size	Φ 1050 mm x 1000 mm
Pallets	2
Weight of pallet	up to 1500 kg
High pressure cooling	70 bar

X axle (movement to left/right)	1400 mm
Y axle (movement up/down)	1200 mm
Z axle (palet go / back)	1325 mm
Pallet size	800 mm x 800 mmMax.
processing size	Φ 1450 mm x 1450 mm
Pallets	2
Weight of pallet	up to 2200 kg
High pressure cooling	70 bar

100 years of tradition and experience

the right supplier for the future
